(54) Title: SPHERICAL PELLETT CONTAINING A WATER-SOLUBLE ACTIVE INGREDIENT

(57) Abstract: A process for preparing spherical pellets comprising (a) a water-soluble active ingredient soluble, freely soluble or very soluble in water; and in particular having a water-solubility of ≥ 0.5 g/ml; (b) a spheronizing agent; (c) a dry lubricant, said method comprising preparing a mixture of the active ingredient, the spheronising agent, the dry lubricant; and an amount of water which is less than 5%, w/w relative to the total weight of the mixture; extruding said mixture to obtain an extrudate; and spheronising the extrudate to form spherical pellets. The invention further concerns pellets obtained by this process and sustained release oral dosage forms containing said pellets.

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
